PALISADES XIII COLLECTION

Style with enhanced performance

Memo samples are recommended to evaluate the quality, design and color of the fabrics selected and are available upon request.

Pattern: **SOAVE,** **SIENA**
Repeat: H-13.5"/V-26.5" Texture

Specifications:
Width: 54"
Content: 100% Polyester

Shown up the roll

Finish: Crypton Barrier
Cleaning Code: W

Performance:
Seam slippage: W.: 119 lbs. / F.: 121 lbs.
ASTM D-4034-95
Tensile strength: W.: 394 lbs. / F.: 178 lbs.
ASTM D-5034
Resistance to abrasion: 100,000 Double Rubs
ASTM D-4157 Wyzenbeek #10 Cotton Duck
Resistance to pilling: 5
ASTM D3511-02
Colourfastness to
Crocking AATCC 8: Wet: 4 / Dry: 4
Colourfastness to
Light AATCC 16E: 40H. Class 4

Flammability:
State of Calif.
TB 117 Sec. E: Pass
UFAC Class 1 Pass
NFPA 260 Pass

How to clean Crypton® with soap and water:
Throughout the years we have recommended that a mild powered enzyme detergent mixed with water is a very effective way to clean Crypton®. It still is. If you choose to use an enzyme detergent, mix 5 parts water with 1 part enzyme detergent (like Tide®/Cheer®).

CRYPTON® IS BLEACH-CLEANABLE
For some specific health care concerns, such as C. difficile, a spore that requires bleach cleaning, the CDC (center for disease control and prevention) requires a 10% bleach/ 90% water mixture to effectively kill any such growth. The 100% Polyester and Acrylic Crypton® printed fabric shown will safely withstand such cleaning and there will not be any color loss after allowing the mixture to remain on the surface for the required 10-minute dwell time. Simply rinse the solution with water after cleaning using standard extraction equipment.
Caution: Color loss can result from higher concentration, longer dwell time, or not rinsing.

EASY CLEANING STEPS
1. If the spot has dried, try lightly brushing or scrape off the residual. Wipe with wet towel.
2. If a spot still remains, apply the soap and water solution to the spot with a light mist.
3. Work area using soft brush or edge of spoon from outside of spot towards the middle.
4. Allow solution to work for approximately one minute.
5. Extract with clean water or blot with clean white towel.
6. Repeat steps 3-5 as necessary until spot is removed.
7. Rinse with clear Juke warm water and blot with a clean soft white towel as the final step.
Again ... make positively certain all soap is completely removed as soap residue will attract more dirt.

HELPFUL HINTS
• Before cleaning, vacuum the upholstery.
• Never spread the spot to the surrounding clean fiber.
• Go slowly, repeat the steps until the spot is removed.
• Do not use a stiff brush that may scratch or tear fibers in the fabric.
• Always seek to reduce the size of the spot.
• As always, test the soap and water solution in a hidden area before proceeding.

STEAM CLEANING
Steam cleaning is another fine method of thoroughly cleaning Crypton®. Spots can be removed by pre-treating them with the soap solution outlined above or a pre-treatment solution from the steam cleaning company. Most solutions provided by these companies are acceptable for Crypton® fabrics.
* * Never use solvent cleaners on Crypton® fabric.* *

Meets and exceeds ACT standards 🍷🐦🌟🌟🌟
